

Scenario Planning Workshop

Neundorfer Training Facility, Willoughby, Ohio. November 9 and 10, 2010.

This special learning event is a practical forum geared toward plant owners and managers who are exploring options for air pollution regulation compliance. You'll learn what scenario planning is and how it works through hands-on application, using possible outcomes from Boiler MACT as a focal point. A panel of experts from Neundorfer, Storm Inc., United Dynamics Corp., David N. French Metallurgists and Paragon Airheater will present sessions and lead small group exercises.

Tuesday, November 9, 2010
